

G&J Aircon Solutions - User Guide

Version: 1.0
Last Updated: December 20, 2025

Table of Contents

- 1. [Getting Started](#)
- 2. [Dashboard Overview](#)
- 3. [Managing Customers](#)
- 4. [Managing Technicians](#)
- 5. [Aircon Unit Management](#)
- 6. [Job Scheduling & Orders](#)
- 7. [Financial Management](#)
- 8. [Reports & Analytics](#)
- 9. [Document Management](#)
- 10. [Administration](#)

1. Getting Started

1.1 Logging In

- 1. Launch the G&J Aircon Solutions application
- 2. Enter your **Email** address in the email field
- 3. Enter your **Password** in the password field
- 4. Click the **Login** button
- 5. If you forgot your password, click "Forgot Password?" to reset it via email

1.2 Navigation

The application uses a **sidebar navigation** system:

- **Desktop View:** A permanent sidebar appears on the left side of the screen
- **Mobile View:** Access the navigation menu via the hamburger icon (≡) in the top-left corner

Main Navigation Sections:

Icon	Section	Description
	Dashboard	Overview of business metrics and pending actions
	Scheduling	Manage job orders and calendar
	Customers	Customer database management
	Technicians	Technician roster management
	Aircons	Aircon unit registry
	Expenses	Financial transaction tracking
	Payments	Payment records
	Reports	Business analytics and charts

	Documents	Document management and generation
	Admin	User management, services, and master data

1.3 Logging Out

1. Locate your user profile at the bottom of the sidebar
2. Click on your profile or the settings icon
3. Select **Logout** to securely exit the application

2. Dashboard Overview

The Dashboard is your **command center** for monitoring business operations at a glance.

2.1 Overview Cards

The top section displays key performance indicators (KPIs):

- **Total Revenue:** Sum of all completed payments
- **Pending Jobs:** Number of jobs awaiting action
- **Active Customers:** Count of current customers
- **Today's Schedule:** Number of jobs scheduled for today

2.2 Attention Section

This section highlights items requiring immediate attention:

-  **Overdue Jobs:** Jobs past their scheduled date
-  **Pending Approvals:** Jobs awaiting confirmation
-  **Unpaid Invoices:** Outstanding payment balances
-  **Notifications:** Click the bell icon to view all notifications

2.3 Today's Job Orders

A quick view of all jobs scheduled for the current day, showing:

- Customer name and contact
- Service type
- Assigned technician
- Job status

Actions:

- Click on any job to view full details
- Use quick actions to update job status

3. Managing Customers

3.1 Viewing Customers

1. Navigate to **Customers** from the sidebar
2. Browse the customer list in table view (desktop) or card view (mobile)
3. Use the **Search bar** to find specific customers by name, phone, or email

3.2 Adding a New Customer

1. Click the **+ Add Customer** button
2. Fill in the required fields:
 - **Name** (required)
 - **Contact Number** (required)
 - **Email** (optional)
 - **Address** (required)
 - **Customer Type**: Individual or Business
3. Click **Save** to create the customer record

3.3 Editing a Customer

1. Locate the customer in the list
2. Click the **Edit** (✎) button on the customer row
3. Modify the necessary information
4. Click **Save** to update

3.4 Archiving a Customer

1. Click the **Archive** button on the customer row
 2. Confirm the action in the dialog
 3. Archived customers can be restored from the archive section
-

4. Managing Technicians

4.1 Viewing Technicians

1. Navigate to **Technicians** from the sidebar
2. View technician profiles with their contact information and specializations

4.2 Adding a New Technician

1. Click **+ Add Technician**
2. Fill in the details:
 - **Full Name** (required)
 - **Contact Number** (required)
 - **Email** (optional)
 - **Specialization** (e.g., Installation, Repair, Maintenance)
 - **Status**: Active or Inactive
3. Click **Save**

4.3 Editing/Archiving Technicians

- Use the **Edit** button to modify technician details
 - Use the **Archive** button to deactivate a technician
-

5. Aircon Unit Management

5.1 Viewing Aircon Units

1. Navigate to **Aircons** from the sidebar
2. Browse all registered aircon units
3. Filter by customer or status

5.2 Registering a New Aircon Unit

1. Click + **Add Aircon**
2. Complete the form:
 - **Customer** (required): Select from existing customers
 - **Brand** (required): Select or add a new brand
 - **Type** (required): Window, Split, Cassette, etc.
 - **Model Number** (optional)
 - **Serial Number** (optional)
 - **Installation Date** (optional)
 - **Location** (where the unit is installed)
 - **Status**: Active, For Repair, Decommissioned
3. Click **Save**

5.3 Managing Aircon Records

- **Edit**: Update unit details or status
 - **Archive**: Remove from active list (data is preserved)
 - **View History**: See all service jobs related to this unit
-

6. Job Scheduling & Orders

6.1 Calendar View

1. Navigate to **Scheduling** from the sidebar
2. The calendar displays jobs for the current month
3. **Navigate months**: Use the arrow buttons (< >) to move between months
4. **Color coding**:
 -  Green: Completed jobs
 -  Yellow: Pending jobs
 -  Red: Overdue jobs
 -  Blue: In-progress jobs

6.2 Creating a New Job Order

1. Click + **New Job Order** or click on a date
2. Fill in the job details:

Customer Information:

- **Customer** (required): Select from dropdown
- **Aircon Unit** (required): Select customer's registered units

Job Details:

- **Service Type** (required): Installation, Repair, Cleaning, Maintenance
- **Description** (optional): Additional notes
- **Scheduled Date** (required): When the job should be performed
- **Scheduled Time** (optional): Preferred time slot

Assignment:

- **Technician** (required): Assign a technician
- **Priority**: Normal, High, Urgent

3. Click **Create Job Order**

6.3 Managing Job Orders

Viewing Job Details:

1. Click on any job in the calendar or list
2. View comprehensive details including customer info, service items, and billing

Updating Job Status:

1. Open the job details
2. Change status using the status dropdown:
 - **Pending → Confirmed → In Progress → Completed**
3. Status updates are saved automatically

Adding Service Items & Billing:

1. Open the job and go to the **Billing** tab
2. Add service items (labor, parts, materials)
3. Adjust quantities and prices
4. The total is calculated automatically

Completing a Job:

1. Ensure all service items are added
2. Change status to **Completed**
3. Generate invoice if required

6.4 Action Banner (Pending Actions)

At the top of the scheduling screen, you'll see a banner showing jobs requiring action:

- Click on the banner to expand the list
- Take quick actions directly from the list

6.5 Creating Follow-Up Jobs

After completing a maintenance job, you can schedule follow-up services:

1. Open a completed job
 2. Click **Schedule Follow-Up**
 3. Select the interval (e.g., 3 months, 6 months, 1 year)
 4. Confirm to create a new scheduled job
-

7. Financial Management

7.1 Expenses Screen

Navigate to **Expenses** to track all financial transactions.

Summary Cards:

-  **Total Income:** All revenue for the selected period
-  **Total Expenses:** All outgoing payments
-  **Net Balance:** Income minus expenses

Viewing Transactions:

- Filter by date range using the date selector
- Filter by type: All, Income, Expense
- View transactions in chronological order

7.2 Recording an Expense/Income

1. Click + **Add Transaction**
2. Select transaction type:
 - **Income**: Payments received from customers
 - **Expense**: Business costs (supplies, utilities, etc.)
3. Fill in details:
 - **Amount** (required)
 - **Category** (required): Select from predefined categories
 - **Description** (optional)
 - **Date** (required)
 - **Linked Job** (optional): Associate with a job order
4. Click **Save**

7.3 Payments Screen

Navigate to **Payments** for detailed payment tracking.

Recording a Payment:

1. Click + **Add Payment**
 2. Select the associated job order
 3. Enter payment details:
 - Amount received
 - Payment method (Cash, Card, Bank Transfer, etc.)
 - Reference number (for tracking)
 4. Click **Save**
-

8. Reports & Analytics

8.1 Accessing Reports

1. Navigate to **Reports** from the sidebar
2. Select the report period using the filter chips:
 - Today
 - Weekly
 - Monthly
 - Last 6 Months
 - Yearly

8.2 Available Reports

Key Performance Indicators (KPIs):

- Total Jobs
- Completed Jobs
- Revenue Generated

- Pending Collections

Business Insights:

- Average Job Value
- Completion Rate
- Top Service Type
- Busiest Day

Financial Overview:

- Income trends over time
- Expense breakdown by category
- Net profit/loss analysis

Service Distribution:

- Pie/bar chart showing service type popularity
- Top performing services

Customer Analytics:

- Top customers by revenue
- Customer acquisition trends

8.3 Interactive Charts

- **Hover** over chart elements to see detailed values
 - **Click** on insight cards to drill down into period-specific data
 - Charts update automatically when you change the date range
-

9. Document Management

9.1 Viewing Documents

1. Navigate to **Documents** from the sidebar
2. Use **Categories** to filter:
 -  All Documents
 -  Invoices
 -  Contracts
 -  Reports
 -  Archived
3. Toggle between **Grid** and **List** view

9.2 Generating Documents

1. Click the **+ Generate** button
2. Select document type:

Statement of Account (SOA):

- Select a customer
- Choose date range
- Click **Generate**

Weekly Report:

- Select the week
- Click **Generate**

Deferment Form:

- Select customer and job
- Fill in deferment details
- Click **Generate**

9.3 Managing Documents

Viewing/Printing:

- Click on a document to preview
- Use the **Print** button to print or save as PDF

Archiving:

- Click the **Archive** button to move to archive
 - Archived documents can be restored or permanently deleted
-

10. Administration

10.1 User Management

(Admin Access Required)

1. Navigate to **Admin > User Management**
2. View all system users and their roles

Adding a New User:

1. Click + **Add User**
2. Fill in:
 - Email address
 - Full name
 - Role: Admin, Manager, Employee
3. A password reset link will be sent to the user's email

Managing Users:

- **Edit:** Modify user details or change role
- **Delete:** Remove user access (use with caution)

10.2 Service Items

1. Navigate to **Admin > Service Items**
2. Manage the catalog of services offered

Adding a Service Item:

1. Click + **Add Service**
2. Enter details:
 - Service Name
 - Description
 - Default Price

- Category

3. Click **Save**

10.3 Master Data

1. Navigate to **Admin > Master Data**
2. Manage reference data used throughout the system:

Editable Categories:

- **AC Brands:** Samsung, LG, Daikin, etc.
- **AC Types:** Window, Split, Cassette, etc.

System References (Read-Only):

- Job Statuses
- Payment Methods
- Service Categories

Mobile App Tips

- **Swipe gestures:** Swipe left on list items for quick actions
- **Pull to refresh:** Pull down on any list to refresh data
- **Floating Action Button (FAB):** Use the + button for quick creation
- **Responsive layout:** The app adapts to your screen size automatically

Keyboard Shortcuts (Desktop)

Shortcut	Action
Ctrl + N	New item (context-dependent)
Ctrl + S	Save current form
Esc	Close dialog/cancel
Enter	Submit form

Troubleshooting

Common Issues

Cannot log in:

- Verify email and password are correct
- Check your internet connection
- Try the "Forgot Password" feature

Data not loading:

- Check your internet connection
- Pull to refresh the screen
- Try logging out and back in

App running slowly:

- Close other running applications
- Clear app cache if available
- Ensure stable internet connection

Getting Help

For additional support:

- Contact your system administrator
- Check the application documentation
- Report bugs through the feedback system

Best Practices

1. **Regular Backups:** Ensure data is synced to the cloud regularly
2. **Complete Job Records:** Fill in all relevant fields for accurate reporting
3. **Timely Updates:** Update job statuses as work progresses
4. **Customer Data:** Keep customer information current
5. **Document Generation:** Generate invoices promptly after job completion
6. **Regular Reviews:** Check the dashboard daily for pending actions
